Terms　　Back

Scrollable terms text here, agree button at the bottom. The button can be made prettier...

I Agree

- This is the screen where the user uploads the word/phrases
- The tabs at the bottom will represent whatever other features we have. The other tabs right now come from Aurora so don't mind them.
- The user can tap on Cloud button on top right to access the cloud generated. This can be shown using a webview of the page.
- When the user taps on the input textfield, a keyboard (black) appears, and the entire view (except the tab bar) shifts up to accommodate the keyboard.
- There will be a "send" button to the right of the textfield.
- User can see his/her own input history or the entire audience's history on the table.
